## THE PERIOD

### The period in brief

- Rental income increased to SEK 3,868m (1,400).
- The operating surplus increased to SEK 2,669m (903).
- Cashflow from operating activities before changes in working capital was SEK 1,590m (450).
- Profit before tax increased to SEK 6,142m (1,526), of which:
  - Profit from property management is included in the amount of SEK 1,601m (508). The profit from property management includes costs for early repayment of loans and other non-recurring costs of SEK -206m (-130).
  - Changes in value of properties are included in the amount of SEK 5,248m (1,136).
  - Changes in the value of derivatives are included in the amount of SEK -268m (-118).
- Profit for the period was SEK 5,734m (1,337) after the deduction of deferred tax of SEK -316m (-137) and current tax of SEK -92m (-52), corresponding to earnings per series A and B ordinary share of SEK 4.15 (1.41) before dilution.
- The value of the property portfolio amounted to SEK 81.2bn (79.5).
- Long-term net asset value (EPRA NRV) calculated in accordance with EPRA's new guidelines for net asset value calculations was SEK 30,886m (9,914), corresponding to SEK 24.36 (13.11) per share.

## THIRD QUARTER

### Significant events during the third quarter

- During the quarter, SBB acquired properties for SEK 4.6bn, with the largest acquisition involving a portfolio of preschools acquired from Norwegian Laeringsverkstedet for a value of NOK 4,250m, with newly-signed 35-year triple-net agreements and with Laeringsverkstedet as the tenant. Of the consideration, NOK 1,400m comprised newly issued series D shares.
- In July, mandatory convertible subordinated notes maturing in 2023 were issued for SEK 2.75bn, of which SEK 2,148 is reported as equity. The mandatory convertibles will mandatorily be converted into new series B shares in SBB. At the same time, an issue of series D shares was conducted in the amount of SEK 607m.
- During the period, SBB launched a new business area, SBB Government Infrastructure, with the objective of acquiring properties within government infrastructure, and which will focus will on ministry and government buildings, prison properties and defence properties.
- During the quarter, the remaining senior unsecured bonds issued by Hemfosa were redeemed. Secured bank loans of SEK 3bn were also repaid. By repaying these loans, the company cuts its financial costs by SEK 90m on a 12-month rolling basis.
- In early September, the municipality of Nyköping adopted a major new zoning plan for central Nyköping. SBB is commissioned with developing an entirely new district in the station adjacent Nöthagen area, encompassing 1,600 homes, as well as schools and health care and residential care facilities
- During the quarter, SBB started and communicated a large number of projects for its own long-term management. These include residentials and elderly care homes in central Västerås, elderly care homes in Borlänge, new police houses in Örensköldsvik, Helsinki and Kiruna, sheltered housing, cultural centers and residentials in Boden and residentials in Haninge. The investments are fully in line with SBB's increased focus on project development as part of achieving the growth target of SEK 125bn in property value by 2025.

### Significant events following the end of the period

- SBB has signed agreements to sell a number of properties, including office properties in Karlshamn and Karlstad, as well as residential apartments in Ronneby at a property value of SEK 722m. An agreement was also signed with Oscar Properties regarding the sale of a property portfolio for SEK 1.4bn, incl. SBB's joint venture Valerum.
- SBB presented a strategic update of a number of focus areas and the ambition of the Board of Directors to propose a dividend of SEK 1 per ordinary series A and B shares to the 2021 Annual General Meeting.
- An agreement was signed for the acquisition of a property portfolio in Finland with mainly elderly care homes and care homes for EUR 222m with an annual rental income of EUR 13.6m and a net operating income of EUR 13.1m.
- After the end of the quarter, the company carried out external valuation of transactions signed after the end of the quarter and agreements that will be entered into during the next 12 months. Regarding community properties, these transactions have an average contract duration of 39.5 years and a fully indexed net operating income of SEK 101m. The outcome of the valuation shows a surplus value that exceeds the acquisition value / investments by SEK 624m.

# SAMHÄLLSBYGGNADSBOLAGET I NORDEN

Ilija Batljan founded SBB in March 2016 with the vision of building the best Nordic property company focused on residential and social infrastructure properties. The company's strategy is to own, manage and develop residential properties in Sweden and social infrastructure properties in the Nordics over the long term. The company also aims to actively conduct project and property development to develop new social infrastructure.

SBB operates in a market with stable and strong underlying driving forces (economic development and population growth). SBB's property portfolio is characterized by a high occupancy rate and long lease contracts. Rental income consists of secure, long-term flows, primarily from Nordic central governments/municipalities/county councils and from rent-regulated residential in Sweden. Of the company's income, 95 percent derives from community properties in the Nordics and Swedish rent regulated residential - social infrastructure. Cash flows are uniquely stable with three of the Nordic central governments being among only ten sovereigns around the world to hold an AAA rating from the three leading credit rating agencies. As a whole, the property portfolio provides exposure to the Nordics' strong demographic trend, with a sharp increase in population compared with the rest of the EU.

## Why a low risk asset?

## Driving force

### Rental apartments

Regulated market with sub-supply combined with social safety net and housing allowance - only 0.17% weak payers among the tenants in all of Sweden's 1.5m tenancies.

Source: Statistics Sweden, Sweden Enforcement Agency, the National Board of Housing,

### Education

Preschools, primary schools, upper secondary schools and universities in the Nordics are publicly funded.

Source: Eurostat

1) Government infrastructure are properties for the police, justice and defence and prisons.

**Why a low risk asset?**

**Driving force**

**Elderly care**

Elderly care in the Nordics is publicly funded and the number of elderly people over the age of 65 in the Nordics is estimated to increase by 32 percent by 2040.

Source: Eurostat, OECD

**LSS**

Publicly funded housing for people with special needs in a housing market characterized by structural shortages.

Source: Statistic Sweden

**Hospitals & health care centres**

In contrast to other parts of the EU/EEA, health care is predominantly publicly funded in the Nordics.

Source: Eurostat

**Police and judiciary**

The police force and judiciary are publicly funded. The Nordic countries currently invest less resources in relation to GDP compared with other EU countries, providing growth potential in pace with population growth and greater political focus is placed on reducing the gap with other EU countries.

Source: Eurostat

**Central government infrastructure, ministries, town halls and public offices**

Sweden, Norway and Denmark are among only ten sovereigns in the world to hold an AAA rating from all leading credit rating agencies.

## SBB's business model and how we generate value

The business model builds on managing the world's most secure assets with exposure to value-generating potential through project and property development, renovations and property transactions. Through its business model, SBB generates long-term, sustainable shareholder value through a high, risk-adjusted annual return.

### Focus on delivery

- Earnings per series A and B ordinary share have increased by 315 percent since 2017
- The dividend per series A and B ordinary share has increased by 900 percent since 2017
- Strong balance sheet: BBB- (investment grade credit rating) from S&P and Fitch

# CEO ILIJA BATLIJAN

As the largest owner of social infrastructure, Samhällsbyggnadsbolaget i Norden AB (SBB) is one of Europe's most socially sustainable company. It is in this role that we shoulder a particular responsibility for society through social initiatives of various types, continuing to invest in sustainability and delivering social infrastructure that is of great importance to very many people. Through renegotiation of lease agreements, new lease agreements and through an active transaction team, our average lease duration for community service properties has increased by 28 percent, from 7 to 9 years. During the second and third quarters, we received 99.8 percent of our rental income, which is probably the highest of all listed property companies in Europe. In addition to various support measures for our tenants, SBB also invested additionally in summer jobs this summer due to the pandemic, with a total of 134 young people thus helping create pleasant local environments around our properties. In line with the UN's global sustainability goals, as part of SBB's sustainability initiative, Vision 2030, SBB's project and property development centres on locations close to transport hubs, where land that has already been exploited is refined rather than taking up important green areas. An amazing example of this is the development of a new district in central Nyköping, adjacent to the central railway station, where brownfield sites are being transformed into a new district with housing and social infrastructure. The zoning plan adopted by the municipal council in September allows for the development of about 1,600 homes.

## Strong earnings increase cash flow by 253 percent

Profit before tax amounted to SEK 6,142m and profit after tax was SEK 5,734m. Adjusted for non-recurring costs and deductions for earnings attributable to preference shares, series D shares and hybrid bonds, profit for the period amounted to SEK 4.39 per series A and B ordinary share.

Cash flow from operations before changes in working capital increased by 253 percent to SEK 1,590m (450) for the first nine months of the year.

Adjusted for non-recurring effects for repurchases of expensive loans and restructuring costs, cash flow for the nine-month period ended up at SEK 1,796m (580).

Adjusted for non-recurring costs, profit from property management increased by 207 percent in comparison with the third quarter of 2019 to SEK 1,910m (623). In addition to loan-repayment costs, non-recurring costs also included restructuring costs and unrealized FX effects. The main reason for the strong increase in profit from property management was the sharp increase in net operating income. At the same time, we continue to lower our average interest rate, ending up at 1.41 percent (1.76) at the end of the period. SBB has no exposure to variable interest rates. The average interest duration for all interest-bearing liabilities is among the longest in the

*” As the largest owner of social infrastructure, SBB is one of Europe's most socially sustainable company.”*

Nordics at 4.9 years (2.8) and the average debt maturity was 4.7 years (3.4). To further strengthen its sustainability profile, SBB intends to launch a framework for social sustainable bonds.

## BBB+ rating in focus

At the end of the period, our pro forma net debt, adjusted for cash inflows from properties that have been sold but not yet transferred and 12 months' earnings capacity divided by total capital, in accordance with S&P's definition of the loan-to-value ratio, amounted to 49.7 percent (see table below).

Interest-bearing liabilities	47 984
50% of hybrid bonds	4 947
Leasing liabilities	460
Cash and cash equivalents	-6 065
Other receivables (sold properties)	-1 953
Financial assets at fair value, realized in Oct 2020	-376
Financial assets at fair value	-1 229
Receivables from associated companies/joint ventures	-1 128
Profit from property management, before dividend (12 months rolling)	-2 822
Cash from building rights	-850
Dividend (shares serie A, B, D, mandatory convertible and hybrid bonds)	1 653
<b>Adjusted net debt 12 months forward</b>	<b>40 621</b>
<b>Adjusted net debt Q3 2020</b>	<b>44 997</b>

Equity	41 983
50% of hybrid bonds	-4 947
Share of value changes as a result of long agreements, not in balance sheet	624
Reversal of reserved but not paid dividend	829
Reversal of reserved but not paid interest mandatory convertible	579
Earnings capacity (12 months rolling)	3 633
Dividend (shares serie A, B, D and hybrid bonds, Q3 2021)	-1 653
<b>Adjusted equity 12 months forward</b>	<b>41 048</b>
<b>Adjusted equity Q3 2020</b>	<b>39 069</b>

<b>Adjusted net debt 12 months forward in % of total capital (S&amp;P adjusted LTV)</b>	<b>49,7%</b>
<b>Adjusted net debt Q3 2020 in % of total capital (S&amp;P adjusted LTV)</b>	<b>53,5%</b>

According to our calculations, we have thus fulfilled the key figures most significant for a BBB+ rating. In the longer term, our objective is to achieve an A- rating. This is supported by the quality of our assets, which have proven to be Europe's most secure in challenging times. We continue to raise our interest coverage ratio, which was a multiple of 3.3 at the end of the nine-month period. We expect it to end up at a multiple of about 3.7 for the full year, to then pass 4 early next year. We have slightly more than SEK 60bn in unencumbered assets; cash balances, including liquidity from properties that have been sold but not yet transferred and financial assets of SEK 9.6bn, as well as available credit commitments of SEK 9.1bn.

## Clear strategy based on sustainability

The integration of Hemfosa has now been fully implemented. The company has taken the best from both organizations and created a joint management organization resting on three clear pillars – community service properties, residentials and LSS housing – safeguarding efficient and qualitative property management moving forward. We supplement our secure cash flows from property management by generating value through property development, renovations and transactions. In property development, we are now focusing on using our extensive portfolio of building rights to construct new housing and community service properties based on the needs of the municipalities, both to be managed in-house by our new organization following the integration of Hemfosa, as well as through joint ventures with parties who assume the construction risk. Project and property development delivered SEK 852m in profit for the nine-month period, greatly exceeding our target of generating an average SEK 500-700m annually in profit from property development. The scenario analyses presented in the appendix to the project and property development section of this report show potential annual profit of SEK 1.1-1.7bn from property development.

In renovations, we continue to deliver on our target of renovating 600 apartments per year. Over the nine-month period, SBB completed the renovation of 437 apartments. A further 80 apartments are currently being renovated and renovation of a further 176 apartments is planned to commence within the next three months. Combined with renovation needs among community service properties, this generates potential for strong recurring earnings.

SBB is focusing on constructing environmentally friendly rent-regulated residentials in Stockholm and Gothenburg. Of the company's previously communicated target of achieving a property value of SEK 125bn by 2025, at least SEK 15bn of that property value shall comprise rent-regulated residentials in Stockholm and Gothenburg.

Elderly people and people with disabilities are currently experiencing shortages of elderly care units and LSS housing. SBB views contributing new elderly care units and LSS housing as an important part of its investment in social sustainability. The number of elderly care units to be managed in-house is set to increase sharply, with total rental income from elderly care units and LSS housing doubling by 2025, from the current level of just over SEK 800m to SEK 1.6bn annually.

## Prospects

The pandemic has exposed major shortcomings in the world's economies. This has required coordinated action by the world's central banks to try and stimulate growth and create new jobs. Unfortunately, to date, the real

economy has failed to generate growth and inflation, while continuing to conduct operations that risk our entire planet by failing to accept responsibility for the climate. The financial market is assuming an increasingly strong leadership role with regard to climate change. This means that the search for secure and sustainable assets will intensify in the years to come. This will benefit SBB's secure cash flows and sustainable business model. In line with earnings for the first nine months of the year and the earnings capacity for the year as a whole, we see SBB delivering strong earnings capacity of SEK 4.86 per series A and B share. We will continue to invest in society by, for example, offering summer jobs to young people living in SBB's portfolio of rent-regulated residentials. As of 30 September 2020, SBB's portfolio of building rights amounted to approximately 2,185,000 sq.m. GFA for social infrastructure, corresponding to approximately 22,000 apartments, making SBB one of the leading property developers in the Nordics. This safeguards long-term value creation and sharp increases in net asset value. Two years ago, we communicated our view that we would be able to deliver the highest annual increase in net asset value among all listed Swedish property companies for the years 2019-2021. The outcome for 2019 ended up at a high 73 percent per series A and B ordinary share. After the first nine months of 2020, we are looking at increasing our net asset value per series A and B ordinary share by 22 percent, paving the way for the continued value creation.

I would like to repeat what I wrote in our Q2 report: "Covid-19 has gone from being a pandemic to also becoming a greatly increased risk to the world economy that leaves no one indifferent. The great uncertainty that currently prevails around economic development requires focus and hard work. Although community service properties and residentials are the least affected by the crisis, it leaves no one unaffected. On the other hand, this is neither the first nor the last crisis with which companies with a long-term focus have had to deal. Crises come and go and you have to be humble in the face of this, but our task is to be a reliable and long-term societal player that delivers shareholder value, good profitability and strong results in a sustainable way."

With that said, all companies also bear an important responsibility to their shareholders, with whose money they are entrusted, and the Board of Directors of SBB has stated clearly that, given the company's current position and prospects, its ambition is to propose to the 2021 Annual General Meeting a dividend of SEK 1 per series A and B ordinary share.

**Ilija Batljan**

# COMMENTS ON THE INCOME STATEMENT

## Net operating income

Rental income during the period amounted to SEK 3,868m (1,400) and for the quarter to SEK 1,204 (507). In a comparable portfolio, rental income increased by 2.2 percent compared with the corresponding period last year. Of the rental income, SEK 645m pertained to residential properties, SEK 3,007m to community service properties and SEK 216m to other properties. The economic occupancy rate at the end of the period was 94.5 percent (95.3). The average contract length for community properties was 9 years (7).

Property costs during the period amounted to SEK -1,199m (-497) and for the quarter SEK -352m (-164). They mainly consist of tax-related costs, operating and maintenance costs and management administration.

In a comparable portfolio, costs decreased by 0.3 percent compared with the corresponding period last year. Accordingly, the net operating income for a comparable portfolio increased by 3.4 percent.

## Segment reporting

For reporting and follow-up, SBB has been divided into three segments: Residential, Community service and Other/Property Development. The division is based on the differences in the nature of the segments and on the reporting the management obtains to follow up and analyze the business, as well as on the data obtained on which to base strategic decisions.

## Profit after tax

In total, the period's costs for central administration amounted to SEK -173m (-85) for the period and SEK -79m (-34) for the quarter. The central administration costs include costs for business development, transactions, property development and financial management. As a result of the acquisition of Hemfosa, the company has had some non-recurring costs during the period. In total, these acquisition and restructuring costs amounted to SEK -49m as of 30 September 2020. Profit from associated companies and joint ventures was SEK 42m (57) for the period.

Net financial items for the period amounted to SEK -888m (-367) and for the quarter SEK -115m (-63). The financial costs include interest for external financing, as well as other financial costs, such as accrued arrangement fees. The financial costs include non-recurring expenses in the form of costs for early redemption of expensive loans of SEK -157m (-130). During the period, exchange rate differences of SEK -103m (15) were reported that are attributable to the translation of loans raised in Euro to the extent that they are not matched against hedges in the form of net assets in Euro and FX derivatives. Value changes for the properties amounted to SEK 5,248m (1,136), of which SEK -588m (-308) were realized value changes and

SEK 5,836m (1,444) were unrealized value changes. The realized changes in value are essentially explained by discounts for deferred tax which are offset by the corresponding lower reported tax. The sales have been made to values slightly higher than valuation. The unrealized changes in value are mainly explained by increased net operating income due to investments and new leases in the property portfolio, e.g. lease agreements with an annual rental value of SEK 462m with an average contract duration of just over 25 years. In addition, SBB has renovated 437 apartments during the period, made project investments in the existing property portfolio such as the rebuilding of the Western Helsinki Central Police Station, new production of police houses in Kiruna and new and rebuilding of a school and elderly care home property in Haninge. Reduced yield requirements attributable to increased demand for long and stable cash flows have also affected the quarter's unrealized changes in value. Profit after tax for the period was SEK 5,734m (1,337). Tax on the profit for the period was SEK -408m (-189), of which SEK -92m (-52) pertained to current tax and SEK -316m (-137) pertained to deferred tax related to properties and loss carryforwards. The low tax is explained by property sales.

# COMMENTS ON THE BALANCE SHEET

## Investment properties

The value of the properties amounted to SEK 81,2bn as of 30 September 2020. The value of the property portfolio has been based on external valuations made by Newsec, JLL, Savills, CBRE and Colliers. The valuations have been based on an analysis of future cash flows for each property, taking into account the current lease terms, market situation, rental levels, operating, maintenance and management administration costs and investment needs. The yield requirements used in the valuation are in the range of 2.25 percent to 15.0 percent with an average rate of 4.5 percent (4.7). The value of the properties includes SEK 3,130m for building rights that have been valued through the application of the local price method, which means that the assessment of the value is based on comparisons of prices for similar building rights. Fair value has thus been assessed in accordance with IFRS 13 level 3. See further on investment properties on page 17-22.

## Associated companies and joint ventures

SBB's engagement in associated companies and joint ventures consists partly of a holding in the companies and in some cases financing to the companies. As of 30 September 2020, participations in associated companies and joint ventures amounted to SEK 1,233m (909) and receivables from associated companies and joint ventures amounted to SEK 1,128m (1,754). Some of the companies conduct property development projects, while other companies own investment properties. The largest holdings consist of the companies KlaraBo Förvaltning AB, Valerum Fastighets AB and Offentlig Eiendom AS.

## Goodwill

The goodwill item of SEK 6,261m (6,687) is largely attributable to the acquisition of Hemfosa and consists mainly of synergy effects in the form of reduced financing and administration costs. In addition, there is a reported goodwill attributable to the difference between nominal tax and the deferred tax that is calculated on the acquisition of properties in company format that must be reported at acquisitions classified as so called business combinations, such as the acquisition of Hemfosa. For reported goodwill of SEK 1,952m, a corresponding amount is recognized under the item deferred tax. Due to properties having been sold, this part decreased over the period. A small part of the goodwill arose through the 2018 acquisition of the company SBB Förvaltning Sverige AB (formerly Hestia Sambygg AB) with 70 employees. The goodwill item arising at the time of the acquisition pertained to the employees.

## Equity

Equity as of 30 September 2020 amounted to SEK 41,983m (30,896). The equity includes issued hybrid bonds with a book value of SEK 9,893m, mandatory convertibles of SEK 2,148m and preference shares in the Norwegian subsidiary Nye Barcode 121 Bidco AS and a minority in Hemfosa Fastigheter AB (publ), as SBB does not hold all of the shares in that company. As shares in Hemfosa have been acquired during the period, the minority interest has decreased by SEK 1,634bn. During the period, SBB carried out issues of series B and D ordinary shares for SEK 2,655m after issue costs that were used as consideration for the acquisition of shares in Hemfosa and acquisition of Laeringsverkstedet. In July, SBB issued a mandatory convertible which, for accounting purposes, has been divided into an equity and a debt component. The part that is reported as equity incl. issue costs amounted to SEK 2,148m. In addition, a perpetual hybrid bond of EUR 500m was issued with a fixed coupon of 2.624 percent.

Translation differences in the translation of net assets in subsidiaries in Norway, Finland and Denmark from local currency to SEK amounted to SEK -1,124m (172) of the change in equity during the period. The effect is mainly explained by the negative development of the Norwegian krona against the Swedish krona during the period.

The equity ratio was 42 percent (30), the adjusted equity ratio was 46 percent (33) and the loan-to-value ratio was 42 percent (41).

## Deferred tax

In Sweden, deferred tax is calculated at a nominal tax rate of 20.6 percent on differences between the reported and tax value of assets and liabilities. In Norway and Denmark, the corresponding tax rate is 22.0 percent and in Finland, it is 20.0 percent. As of 30 September 2020, the deferred tax liability amounted to SEK 6,310m (6,237) and is largely attributable to investment properties and loss carryforwards. The loss carryforwards amount to approximately SEK 3,9bn as of 30 September 2020.

## Debt and cash and cash equivalents

At the end of the period, interest-bearing liabilities in the Group amounted to SEK 47,984m (56,091), of which SEK 11,707m (25,985) pertained to liabilities to credit institutions, SEK 32,461m (25,162) pertained to bond loans and SEK 3,816m (4,944) pertained to commercial paper. See further under the section Financing on page 23. Cash and cash equivalents amounted to SEK 6,065m (12,858).

Norwegian National Association for Heart- and Lung Disease	122	3,3
Academedi	113	3,0
Attendo	78	2,1
Ambea	74	2,0
Västra Götaland County Council	61	1,6
<b>Sum 10 largest tenants</b>	<b>1 891</b>	<b>50,7</b>
Other	1 838	49,3
<b>Total rental income</b>	<b>3 729</b>	<b>100,0</b>

## Rental income from community service properties by area of use

Use	Rental income, SEKm	% of total
Education	1 320	35,4
Elderly care	516	13,8
Homes for people with disabilities	305	8,2
Hospitals and health centres	286	7,7
Government infrastructure and justice	556	14,9
Municipality and department properties	418	11,2
Public offices	326	8,8
Other	2	0,0
<b>Total</b>	<b>3 729</b>	<b>100,0</b>

## Supply and demand for social infrastructure

The need for community service properties is very large. The graph below illustrates the number of planned elderly care units and upper-secondary schools up until 2022 in relation to the actual need. The market for Swedish rent regulated residentials is also characterized by an extensive supply deficit, with the average queue time for an apartment in the Stockholm region being about ten years.

### Planned and needed community service properties

Source: SKR

## Sensitivity analysis

The property valuations are made according to accepted principles based on certain assumptions. The table below presents how the value has been impacted by a change in certain parameters assumed for the valuation. The table provides a simplified illustration as a single parameter is unlikely to change in isolation.

	Change	Value impact
Rental value	+/- 5 %	3 656 / -3 669 SEKm
Discount rate	+/- 0,25 %	-2 267 / 2 441 SEKm
Exit yield	+/- 0,25 %	-2 528 / 2 852 SEKm

In addition to a major deficit of social infrastructure properties, there is also considerable potential for further letting of the existing portfolio. In the autumn of 2019, leading property adviser Newsec analyzed rent levels for newly produced community service properties in Sweden. The graph below shows rent levels in the new production analysis in relation to average rent levels for SBB's portfolio.

### Rent per sq.m. for new production, compared with SBB's existing portfolio of community service properties

# ADDITIONAL INCOME STREAMS FROM SBB'S BUSINESS MODEL

In addition to working with traditional active property management with income from sovereigns with the highest credit rating and Swedish rent regulated residentials, SBB conducts three more value-generating activities:

- (1) Project and property development
- (2) Renovations
- (3) Property transactions

## 1. PROJECT AND PROPERTY DEVELOPMENT

Project and property development within SBB is to generate an average annual profit of SEK 500 - 700m over a business cycle. Profit from project and property development amounted to SEK 852m for the period and SEK 594m for the quarter. The result from property development is calculated as the sum of result from project development (calculated as change in market value of properties with ongoing major projects during the period with deductions for investments during the period) and result from development of building rights.

For SBB, project and property development entails developing building rights and the development of properties to be managed by the company itself and where the contractor assumes complete responsibility for the implementation of the project. For a scenario analysis of upcoming project development gains, see Appendix 3 of the report. As of 30 September 2020, SBB's portfolio of building rights amounted to approximately 2,185,000 sq.m. GFA for social infrastructure, corresponding to approximately 29,000 apartments, making SBB one of the leading property developers in the Nordics.

In line with the UN's global sustainability goals, as part of SBB's sustainability initiative, *Vision 2030*, SBB's project and property development centres on locations close to transport hubs, where land that has already been exploited is refined rather than taking up important green areas. SBB is driven by modern housing enabling people to live without needing a car of their own, with it being necessary for transport options, local services, healthcare, schools and residential care to be available in the vicinity. Most of SBB's development properties are located close to

designated priority transport hubs, such as commuter rail stations and key regional rail hubs. In addition, most of the development projects include housing, as well as schools, elderly care units and other community services

## Development of building rights

SBB divides the development process into four phases: Project concept (phase 1), Pre-planning approval (phase 2), With planning approval (phase 3), and Legally enforceable zoning plans (phase 4). The following tables detail SBB's building rights projects by phase.

## Projects in progress

As of 30 September 2020, the total volume of new production projects for management by the company was approximately SEK 4.7bn. SBB makes the assessment that the projects in progress will be completed within the next 12 - 36 months. In the following tables, the projects in progress for management by the company are summarized by region and type.

Selection of projects in progress for management by the company

- New production of police station in Kiruna
- Construction of a cultural centre for the Municipality of Skellefteå
- Construction of elderly care unit (Municipality of Västerås) and rent regulated residentials in Västerås

## Property development in joint ventures

To contribute to urban development and to secure production resources, in several cases SBB has entered into joint ventures with the buyer of the building rights for the development of the building rights and in some cases joint ventures to jointly develop building rights. SBB assesses the profit potential in these arrangements to be around SEK 1.4bn less SBB's own investment in the building rights. This profit potential is in addition to the above described surplus values as regards building rights development. SBB takes a very limited implementation risk in the joint ventures in that the other joint venture party takes responsibility for project planning, sales, production and project management. The profit potential of around SEK 1.4bn relates to one development cycle and only relates to already agreed upon joint ventures.

Illustration of the new police station that SBB is constructing for the Swedish police in Kiruna.

## Development of building rights

### Planning process

Planeringsfas	Internal planning committee	Sent to planning authorities	Decision from planning authorities to initiate zoning plan	Political decision to approve zoning	Legal force	Production	GFA building rights (sq.m.)	External valuation (SEKm)	SEK per sq.m.

New construction projects in progress, by region

## 2. RENOVATION, REMODELLING AND EXTENSION

Renovations means the renovation of rent regulated residential (with a goal of 600 renovated apartments per year) and the renovation of the company's community service properties. During the first three quarters of the year, SBB finished renovating 437 apartments. A further 80 apartments are currently being renovated and the leases on 176 apartments have been terminated, with renovation planned to commence within a three-month period.

In addition to renovations of apartments, SBB has a larger volume of remodelling projects and tenant adaptations involving the company's community service properties. The total volume of these projects is approximately SEK 1,958m, which is illustrated in the table below. Examples of ongoing renovations are the conversion of commercial space in Haninge to a school and an elderly care home and the renovation of Western Helsinki Central Police Station.

## 3. TRANSACTIONS

SBB's principal focus is always on generating value from the existing portfolio while also building significant shareholder value by recovering

capital when fully developed properties and/or non-core properties are sold. SBB continuously assesses the portfolio to identify potential and focus resources on the properties offering the greatest potential. SBB continuously works to sell properties assessed as fully developed or not assessed to be core holdings. Selling such properties entails capital being recovered and resources being freed up to facilitate additional attractive acquisitions whereby the quality of the portfolio is gradually raised.

The company's history of property transactions has made it a market leader in the Nordic region and the preferred buyer among both public and private sector vendors, primarily because of SBB's superior professionalism, capacity to execute transactions quickly and high degree of credibility and integrity in the business relationship. The company has a history of acquiring properties with AAA cash flows and untapped potential value. Combined with a continuous pipeline of acquisitions and sales, this allows the company to constantly recover capital to generate benefit for shareholders.

In this value-generating area, the company is also able to seize upon opportunities to make investments with a shorter investment horizon where these are deemed to generate shareholder benefit and include investments in equities and/or debt instruments.

	WAULT (years)	Investment (mSEK)	Share CS (%)	Share RE (%)	Lettable area (sq.m.)	Accrued as per 2020-09-30 (mSEK)	Increased NOI (mSEK)	Yield on cost (%)

1,41% Average interest rate

**BBB- Stable outlook (S&P)**  
**BBB- Stable outlook (Fitch)**

## Significant events during the third quarter

In the third quarter of 2020, the ongoing Coronavirus pandemic had the greatest impact on the financial markets. The economic slowdown in the early spring of the year was unprecedented. The situation improved somewhat in the second quarter, becoming significantly better in the late summer. The recovery has brought better-than-expected access to finance in the autumn, despite the prevailing Coronavirus pandemic. The negative macro forecasts have been adjusted upwards, with indicators suggesting that this trend will persist. Sweden's GDP trend has recovered very quickly. The Riksbank (Swedish Central Bank) expects the decline in GDP to end up at 3.6 percent for 2020, and it expects GDP growth of 3.7 percent for 2021.

While remaining at high levels, credit margins among investment grade companies with a BBB rating level have recovered somewhat. This means that the credit margin for a corporate bond with a maturity of five years is approximately 30 basis points higher now than before the crisis. Comparing credit margins for different sectors, the trend has been worse in the property sector than in other sectors. The industrial sector has returned to the same levels as prior to the outbreak of the Coronavirus pandemic.

SBB has continued its strategy of repurchasing bonds issued at high interest rates and redeeming expensive bank loans. During the quarter, bonds were repurchased for SEK 240m and terms were renegotiated for bank loans of SEK 3,000m. Bonds of SEK 2,300m issued by Hemfosa Fastigheter AB have been repaid. During the period, bonds with a nominal value of SEK 1,560m were issued within the framework of the EMTN Programme. The issues were denominated partly in NOK for a total of NOK 900m, and partly in SEK for a total of SEK 700m. The bonds have maturities of between three and seven years.

## Interest-bearing liabilities

SBB's strategy is to maintain a low level of financial risk. The loan-to-value ratio shall be less than 50 percent, the interest coverage ratio shall exceed a multiple of 3.0 and the secured loan-to-value ratio shall be less than 30 percent. The loan-to-value ratio was 42 percent (41) and the secured loan-to-value ratio was 13 percent (26). The interest coverage ratio was 3.3 (2.4). At the end of the period, the fair value of interest-bearing liabilities and other financial instruments was deemed to correspond to the carrying amount.

At the end of the period, interest-bearing liabilities amounted to SEK 47,984m (56,091) of which SEK 11,707m (25,985) pertained to liabilities to credit institutions, SEK 32,461m (25,162) pertained to bond loans and SEK 3,816m (4,944) pertained to commercial paper. Loans from credit institutions are normally secured through property mortgages. Issues of bonds and commercial paper are not normally secured. SBB has two secured bonds; (NO963342624) of SEK 466 maturing in December 2021 and (NO0010777683) of NOK 620m maturing in November 2023.

SBB has continued to work actively to lower the interest rate on its interest-bearing liabilities. At the end of the period, the average interest

rate on the interest-bearing liabilities was 1.41 percent (1.76). SBB has no exposure to variable interest rates. The average period of fixed interest for all interest-bearing liabilities was 4.9 years (2.8) and the average debt maturity was 4.7 years (3.4). Excluding commercial papers, SEK 568m matures within one year. To manage the refinancing risks, the commercial paper has been secured through back-up facilities covering all outstanding commercial paper at all times.

## Mandatory Convertible subordinated note

In July, SBB issued a mandatory convertible subordinated note for SEK 2,750m maturing in July 2023. The issue price was set at 100 percent and the convertible note carries an annual interest rate of 7 percent. On maturity, the convertible note is converted into series B SBB shares, subject to the entitlement to premature conversion of SBB and the holders of the convertible note or on fulfilment of certain specific criteria, in accordance with the terms of the convertible note. The minimum conversion price of the convertible note, applied if SBB demands early redemption, is SEK 24.60 per series B share, and the maximum conversion price is SEK 30.44 per series B share, corresponding to a premium of 23.75 percent in relation to the reference price of SEK 24.60 on issuing the note. The number of shares issued in the event of mandatory conversion on maturity will be linked to the prevailing market price for SBB's series B shares at the time of conversion. The number of shares issued upon conversion will decrease proportionally as the price for series B shares increases within the limits set in accordance with the terms of the convertible note. For accounting purposes, the convertible note is divided into an equity component and a debt component, with the debt portion corresponding to the present value of the future interest payments for the instrument.

## Exchange risk

Because SBB holds assets in Sweden, Norway, Finland and Denmark, it is exposed to currency risks. This currency risk is mainly attributable to income statement and balance sheet items in foreign currencies being translated into Swedish kronor. SBB mainly hedges currency exposure by signing forward exchange contracts, signing interest rate swaps when issuing bonds in foreign currencies, raising loans in foreign currencies.

## Liquidity

SBB's available liquidity amounted to SEK 6,065m and financial investments amounted to approximately SEK 1,605m. SBB also has SEK 9,077m in the form of unutilized credit facilities. No additional securities need to be pledged for the credit facilities to be used.

## Change in value of derivatives

Interest-rate derivatives are used to limit the interest rate risk for loans with variable interest and to increase predictability in the company's profit from property management. At the end of the period, the total nominal value of the interest-rate derivatives amounted to SEK 16,622m (14,300) with maturities of between one and ten years. By means of interest-rate derivatives, SBB has hedged 100 percent of its floating interest-bearing liabilities maturing within one year. In accordance with the accounting rules in IFRS 9, derivatives must be marked-to-market. If the agreed interest rate deviates from the market rate, a surplus or deficit arises on the interest rate derivatives, with the change in value not affecting cash flow being reported in the income statement. At the end of the period, the fair value of the interest-rate derivatives and FX derivatives amounted to SEK -120m (48).

## Rating

SBB has an official credit rating from Fitch Ratings and Standard & Poor's Global Ratings. This rating is rating BBB- with stable outlook. SBB also has a short rating of F3 from Fitch and of A3 from Standard & Poor's, corresponding to an investment grade rating. The reason for also having a short rating is to enable the company to issue securities on the commercial paper market.

# SUSTAINABILITY

*At the UN summit in September 2015, the world's national leaders adopted 17 global sustainable development goals. The countries of the world have committed to lead the world to a sustainable and fair future from 1 January 2016 until 2030. The 2030 Agenda for Sustainable Development covers the three dimensions of sustainability: social, economic and ecological – Eradicating extreme poverty, reducing inequality and injustice, solving the climate crisis. Sustainability is a natural part of our business model and we strive to be the most sustainable property company in the world.*

## Focus on sustainability

It is pleasing to note that SBB's long-term sustainability efforts give great results within ecological, social and economic sustainability.

## Ecological sustainability

In August, SBB's management team adopted an environmental and quality management system that will ensure a structured and uniform approach to issues of the environment and quality throughout the company.

Matters including procedures for new construction, remodelling, renovation and management are regulated. Procedures are also defined for producing a training plan in the areas of the environment and quality. The work of developing a training plan commenced in close connection with the decision to adopt the environmental and quality management system and an initial training session has been booked in November.

During the third quarter, SBB started up energy projects at the Isbjörnen 5 property in Södertälje, the Majsen 3 and Kråkan 1 properties in Avesta, the Västland 26:39 property in Sundsvall and the Kvarnluckan 1 property in Stockholm. In addition, SBB has initiated the procurement of additional energy projects at the Hosjö and Korsnäs areas in Falun, as well as at an additional four properties in Södertälje. The objective at all of these properties is to achieve energy savings of at least 30 percent. The projects will generate positive environmental effects and reduce CO2 emissions. They will also generate good financial returns, as well as better housing comfort for SBB's tenants. SBB has also begun the process of automating its energy monitoring work by developing an AI robot that analyzes and compiles consumption data from energy invoices.

SBB has also decided to provide a housing app to all residential tenants commencing from the autumn of 2020. The objective is to provide added value to SBB's tenants, while also generating additional income streams through add-on sales and by mediating supplementary services. The big gain is expected to come from minimizing the use of paper for information and invoicing.

During the third quarter, Mid Sweden University and SBB agreed on a new long-term green lease for the Åkroken campus in Sundsvall. This long-term agreement enables SBB to invest in aquifer thermal energy storage and cooling for the premises of Mid Sweden University. The savings provided by this contractual solution will benefit both parties by reducing overall costs. The partnership will also enable the certification of the property, allowing it to be included in SBB's framework for green financing.

## Social sustainability

During the third quarter, SBB decided to introduce youth housing in its portfolio of rent-regulated residentials. Making it easier for young people to secure their own rental contracts represents a clear social contribution by a landlord, with employment and housing being two crucial criteria in avoiding social exclusion. SBB's local leasing agents earmark smaller

apartments (studio apartments and one-bedroom apartments, with living room, kitchen and bathroom), preferably in locations with good public transport. Applications, lease signings, terms and conditions are identical to SBB's ordinary administrative procedures, except that the tenant must be under 26 years of age on the date on which he/she signs the contract.

In September, the Municipality of Nyköping adopted a major new detailed development plan for the Nöthagen area, adjacent to Nyköping station. Today, this is an industrial area, but five years from now, the beginnings of a new district will be completed with housing, schools, health care facilities and residential care units with a total 160,000 sq.m. GFA. SBB has involved the relevant stakeholders, including public authorities, organizations and the local community during the consultation and review stages of the planning process. The new detailed development plan takes socio-demographic trends into account by transforming a brownfield site into a neighbourhood with housing, schools, health care facilities and residential care units, all with nearby public transport connections.

This year 134 young people were given summer jobs at SBB. The young people offered summer jobs live in SBB's residential properties. This helps these young people enter the labour market, enhancing well-being in the local environment for SBB's tenants. The summer-time employees perform various tasks including weeding and tidying flower beds and pathways, cutting hedges, mowing lawns and painting and oiling outdoor furniture and playgrounds, as well as painting interior basement corridors.

During the third quarter, SBB donated ten family tents to the UNHCR to assist its intensive on-site provision of humanitarian aid to the victims of the violent explosion in Beirut. The UNHCR put up temporary housing for people who had lost their homes. Building materials, tarpaulins, tents and tens of thousands of other items, including blankets and mattresses were sent to help the worst affected.

Commencing from the third quarter, SBB is reporting more detailed data on income from various asset classes to further increase transparency and elucidate the social values inherent in SBB's business model. The schools category has, for example, been subdivided into preschools, primary and secondary schools, as well as universities and colleges.

## Economic sustainability

During the third quarter, SBB issued three green bonds amounting to SEK 400m within its green financing framework, which was updated in the second quarter. This framework received a "Medium Green" assessment from the Center for International Climate and Environmental Research in Oslo, Norway (CICERO).

SBB aims to achieve an investment grade rating of BBB + in the short term and A- in the long term. This report clearly shows that SBB is well on its way to achieving the goal.

# THE SHARE

Samhällsbyggnadsbolaget's series B shares (ticker SBB B) and series D shares (ticker SBB D) are traded on Nasdaq Stockholm, Large Cap. The company's preference share (ticker SBB PREF) is traded on Nasdaq First North Premier Growth Market.

As of 30 September 2020, the number of series B ordinary shares totalled 1,058,115,105, while series D shares totalled 172,021,720. There was a total 30,713 preference shares, as well as 209,977,491 ordinary series A shares. Ordinary series B shares were trading at SEK 27.18, series D shares at SEK 31.50 on 30 September 2020. The market capitalization of the series B shares (including the value of unlisted series A ordinary shares at the same price) was SEK 34,466m, for the series D shares, it was SEK 5,419m.

The closing price for SBB's shares fluctuated between SEK 13.54 and 31.65 over the nine months of the year, closing at SEK 27.18 at the end of the third quarter. This is an increase of 28 percent compared with 30 September 2019 (SEK 21.15).

The liquidity of SBB's share has increased over the year. The average daily trading volume was approximately SEK 187.7m, compared with SEK 20.6m for the corresponding period last year, while the average on Large Cap Stockholm was SEK 135m. This amounts to an increase of 810 percent. SBB works actively with its investor base by participating in roadshows, presentations and events for private and institutional investors.

## SERIES D SHARE DEVELOPMENT, PAST 12 MONTHS

## Shareholders

On 30 September 2020, share capital amounted to SEK 144,014,502.9 at a quotient value of SEK 0.10 per share. At the Annual General Meeting, holders are entitled to one vote per series A ordinary share and to 0.1 votes per series B and D ordinary share, and per preference share. The preference shares convey preferential rights, over the ordinary shares, to

an annual dividend of SEK 35 per preference share, divided into quarterly payments. Holders of series D ordinary shares are entitled to five times the total dividend on series A and B ordinary shares, although not to more than SEK 2 per share and year.

Shareholders	Class A shares	Class B shares	Class D shares	Preference shares	Share capital, %	Votes, %

# ADDITIONAL INFORMATION

## GENERAL INFORMATION

Samhällsbyggnadsbolaget i Norden AB (publ) (SBB), corp. ID no. 556981-7660, with its subsidiaries conducts operations in property management and property development. The Parent Company is a limited liability company registered in Sweden and based in Stockholm.

## ACCOUNTING PRINCIPLES

### Principles for the consolidated accounts

The consolidated accounts have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations issued by the IFRS Interpretation Committee (IFRIC). In addition, the Swedish Annual Accounts Act and "RFR1 Supplementary Accounting Rules for Groups" have been applied. The Parent Company applies the same accounting principles as the Group with the exceptions and additions stated in the recommendation RFR 2 Accounting for Legal Entities issued by the Swedish Financial Reporting Board. This interim report was prepared in accordance with IAS 34 Interim Reporting. The same accounting and valuation principles were applied as in the latest Annual Report; refer to SBB's 2019 Annual Report, pages 50-117, except that stated below.

### Information on new standards

#### Amendments to IFRS 3

On 22 October 2018, IASB issued amendments regarding the definition of a business combination in IFRS 3. Among other things, the changes mean that a company may choose to carry out a so-called. concentration test that if it indicates that the acquisition is an asset acquisition it means that no further assessment is required. However, the test never answers the question of whether an acquisition is a business acquisition and can only show if it is an asset acquisition. This voluntary test means that if substantially all of the fair value of the gross assets acquired can be attributed to an asset or group of similar assets, the acquisition constitutes an asset acquisition. The changes, if introduced in IFRS 3, are expected to result in more acquisitions being reported as asset acquisitions compared to current guidance. SBB estimates that the change will not affect the share of asset acquisitions in relation to business acquisitions to any great extent, since the majority of the acquisitions made relate to asset acquisitions. The amendment shall apply for fiscal years beginning on 1 January 2020 and is decided by the EU.

#### Hedge accounting

Since 1 January 2018, the Group applies hedge accounting for currency loans. Currency loans issued in EUR have been used as hedges against net assets in Finland. The effect of the hedge accounting is that the unrealized exchange rate differences of SEK -33m net after tax in the translation of the loan at the closing day rate were recognized in other comprehensive income. In the Swedish Group, there is also a currency loan in NOK that is used as a hedge against net assets in Norway. The effect of the hedge accounting is that the unrealized exchange rate differences of SEK 153m net after tax in the translation of the loan at the closing day rate were recognized in other comprehensive income.

#### Related-party transactions

In addition, SBB acquired the company Hestia Sambygg AB on 26 March 2018, of which 49 percent was previously owned by the principal owner Ilija Batljan Invest AB. The purchase price paid to Ilija Batljan Invest AB was SEK 1. Until the acquisition, SBB purchased consulting services relating to financial and technical property management from the company. The pricing for the services was based on a market-based square metre price. After the acquisition, these services are conducted in-house.

SBB has an incentive programme for the company's current and future employees, which comprises 20,000,000 warrants that entitle the holder to subscribe for the corresponding number of Class B shares in the company. The subscription price for new subscription of B shares corresponds to 130 percent of the average of the company's B shares' volume-weighted last price during the 10 trading days from 24 October 2017 through 6 November 2017. Subscription of B shares on the basis of warrants may take place in the period from on 1 October 2020 until 31 October 2020.

#### Reporting of mandatory convertible subordinated notes

During the period, SBB issued a mandatory convertible amounting to SEK 2.75bn maturing in 2023. The convertible has an annual interest rate of 7% which is paid semi-annually, subject to the company's ability to defer interest payments under certain circumstances. The convertible will be mandatorily be converted into the company's B shares no later than maturity. At the first reporting, a division has been made into equity and debt, respectively, in accordance with IAS 32. Reported debt corresponds to the present value of future interest payments. Equity constitutes the remaining part of issued capital. The issue costs have been divided between the two parts. At the first reporting, SEK 2,148m was reported as equity and SEK 530m as debt.

## INFORMATION OF SIGNIFICANT EVENTS FOLLOWING THE END OF THE PERIOD

After the end of the period, an agreement was signed with Oscar Properties for the sale of a property portfolio for SEK 1.4bn, incl. SBB's joint venture Valerum. The sale is conditional on the buyer receiving the necessary financing and additional equity. SBB has made an undertaking to the investors in the secured bond issued in connection with the sale to repurchase parts of the properties in an amount corresponding to 67% of their market value in the event of a breach of covenants.

The Board of Directors and the CEO provide their assurance that the interim report provides a fair overview operations, position and results of the Parent Company and the Group and describes significant risks and uncertainties that affect the Parent Company and the companies included in the Group.

# AUDITOR'S REVIEW REPORT

---

## INTRODUCTION

We have reviewed the condensed interim report for Samhällsbyggnadsbolaget i Norden AB as at September 30, 2020 and for the nine months period then ended. The Board of Directors and the Managing Director are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

## SCOPE OF REVIEW

We conducted our review in accordance with the International Standard on Review Engagements, ISRE 2410 Review of Interim Financial Statements Performed by the Independent Auditor of the Entity. A review consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and other generally accepted auditing standards in Sweden.

The procedures performed in a review do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, the stated conclusion based on a review does not bear the same degree of certainty as the stated conclusion based on an audit.

## CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Swedish Annual Accounts Act regarding the Group, and in accordance with the Swedish Annual Accounts Act regarding the Parent Company.

Stockholm, 3 November 2020

# DEFINITIONS

## Financial definitions

### **Actual net asset value (EPRA NTA), SEK**

Equity attributable to the ordinary share, excluding equity related to preference and D shares, non-controlling interests and hybrid bonds, adjusted for estimated actual deferred tax at 5.5 percent and reversal of goodwill and derivatives.

*The key figure provides an adjusted and complementary measure of the size of equity calculated in a manner consistent with listed property companies.*

### **Number of preference shares outstanding**

The number of preference shares outstanding at the end of the period.

### **Number of ordinary shares outstanding**

The number of ordinary shares outstanding at the end of the period.

### **Return on equity, %**

Net profit for the period in relation to average equity for the period.

*The key figure shows SBB's return on equity during the period.*

### **Loan-to-value ratio, %**

Net debt in relation to total assets.

*The key figure is used to illustrate SBB's financial risk.*

### **EPRA**

European Public Real Estate Association is an organization for listed property companies and investors in Europe. EPRA sets standards regarding financial reporting.

### **EPRA Earnings, SEK**

Profit from property management less estimated current tax attributable to the profit from property management. Taxable profit from property management refers to profit from property management less tax deductible depreciation and renovations.

*The key figure provides information on profit*

*from property management calculated in a uniform manner for listed property companies.*

### **Profit from property management**

Profit before changes in value and tax.

*The key figure provides a measurement of the operations' profit generation regardless of value changes.*

### **Average number of preference shares**

The number of preference shares outstanding weighted over the period.

### **Average number of ordinary shares**

The number of ordinary shares outstanding weighted over the period.

### **Average interest, %**

Weighted average contracted interest for interest-bearing liabilities at the end of the period excluding unutilized credit facilities.

*The key figure is used to illustrate SBB's financial risk.*

### **Average fixed interest term, years**

Average remaining duration until an interest-adjustment point for interest-bearing liabilities.

*The key figure is used to illustrate SBB's financial risk.*

### **Adjusted equity/assets ratio, %**

Reported equity including owner loans and convertibles, with reversal of reported deferred tax liability as a percentage of total assets.

*The key figure is used to illustrate SBB's financial stability.*

### **Tied-up capital, year**

Remaining maturity of interest-bearing liabilities.

*The key figure is used to illustrate SBB's financial risk.*

### **Cash flow from operating activities, SEK**

Cash flow from operating activities before changes in working capital according to the cash flow statement.

### **Long-term net asset value (EPRA NRV), SEK**

Recognized equity attributable to the ordinary share, excluding equity related to preference and D shares, non-controlling interests and the hybrid bond, adding back deferred tax liability, goodwill attributable to deferred tax and derivatives.

*The key figure provides an adjusted and complementary measure of the size of equity calculated in a manner consistent with listed property companies.*

### **Net debt, SEK**

Interest-bearing liabilities less cash and cash equivalents.

### **Earnings per ordinary share A and B, SEK**

Net profit for the period after dividend to preference shareholders and holders of D shares and interest on hybrid bonds in relation to the average number of ordinary shares A and B for the period.

### **Interest-coverage ratio, multiple**

Profit from property management (past 12 months) after return of financial costs in relation to financial costs excluding costs for early repayment of loans and leasing costs.

*The key figure is used to illustrate financial risk.*

### **Equity/assets ratio, %**

Reported equity as a percentage of total assets.

*The key figure is used to illustrate SBB's financial stability.*

**Secured loan-to-value ratio, %** Secured liabilities as a percentage of the total assets.

*The key figure is used to illustrate SBB's financial stability.*

## Property-related definitions

### **Number of properties**

Number of properties at the end of the period

### **Number of sq.m.**

Total area in the property portfolio at the end of the period

### **GFA**

Gross floor area

### **Yield, %**

Net operating income (rolling 12 months) in relation to the sum of the properties fair value at the end of the period excl. the value for building rights and project properties.

*The key figure is used to illustrate the level of return on the net operating income in relation to the value of the properties.*

### **Net operating income, SEK**

Rental income less property costs.

### **Economic letting ratio, %**

Rental income as a percentage of rental value

*The key figure is used to facilitate the assessment of rental income in relation to the total value of potential lettable area.*

### **EPRA Vacancy rate, %**

The rental value of vacant leases divided by the rental value of the entire portfolio.

*The key figure is calculated in accordance with the EPRA definition, which enables comparison with other companies.*

### **Average contract length of social infrastructure properties, years**

Remaining contract value in relation to annual rent for social infrastructure properties.

*The key figure aims to illustrate SBB's rental risk.*

### **Rental income, SEK**

Charges for the period with deductions for rental losses.

### **Rental value, SEK**

Refers to contracted rent plus the assessed rent on vacant space.

### **Market value of properties, SEK**

Fair value of the properties at the end of the period.

### **Surplus ratio, %**

Net operating income as a percentage of rental income for the period. The key figure shows how much of the rental income remains after direct property costs.

# APPENDIX 1 – CURRENT EARNINGS CAPACITY FROM PROPERTY MANAGEMENT

The current earning capacity for the Group for 12 months is presented below and takes into account the Group's property portfolio at 30 September 2020. The current earning capacity is not a forecast, but only to be viewed as a hypothetical snapshot and is presented only to illustrate income and expenses on an annual basis, given the property portfolio, financial costs, capital structure and organization at a set point in time. The Group's earning capacity does not include the earning impact of unrealized and realized value changes.

The following information forms the basis for the calculation of the earning capacity:

- Contracted rental income on an annual basis (including supplements and rental discounts) and other property- related revenues on the basis of current lease contracts as of 30 September 2020.
- Operating and maintenance costs are based on budget.
- The property tax is calculated from the properties current tax assessment value as of 30 September 2020.
- Cost for central administration is based on the current organization.
- Financial expenses are based on contracted interest rates and include interest on external loans.

## THE GROUP'S EARNINGS CAPACITY

Numbers in SEKm	Community service	Residential	Other	Total	Adjusted <sup>1)</sup>

Result (SEK/sq.m. lettable area)	10,000
Efficiency ratio (GFA/lettable area)	0,85
<b>Result (SEK/sq.m. GFA)</b>	<b>8,500</b>

## Sensitivity analysis

### Return asset value and earnings including long-term value change

Return asset value and earnings including long-term value change in companies that manage so-called real assets, such as properties; the profit from property management only reflects a part of the overall earnings. The definition of real assets states that they are value-protected, meaning over time and with good maintenance they have a value growth trend that compensates for inflation. The net asset value, i.e. the denominator in the return ratio profit/capital, is adjusted annually through the IFRS rules with regard to value changes. To provide a correct return, the numerator, i.e. profit, must also be adjusted in the same way. The recognized profit from management operations must accordingly be supplemented with a value change component and effective tax to provide an accurate picture of profit and return.

One problem is that value changes can vary strongly between years and quarters and entail volatile results. For a long-term actor with a stable cash flow and a well-composed property portfolio, the long-term value change (or when lacking this, the long-term average inflation rate) can be used to adjust the numerator in the equation. Given our brief history, we have chosen to use inflation averages for the previous ten years.

	Result recurring income streams = SEK 1 500m			Result recurring income streams = SEK 1 700m		
	<i>Value change</i>			<i>Value change</i>
